Australian Gas Networks Limited

Queensland Network Tariffs - from 1 July 2019

Tariff R (Domestic Haulage Service – Charges per Network Day excl GST)

Tariff Zone	Brisbane and Riverview	Northern
Fixed Charge (\$/day)	\$0.3742	\$0.3742
Charge for the first 0.0082 GJ of gas delivered (\$/GJ)	\$40.5290	\$44.5791
Charge for the next 0.0192 GJ of gas delivered (\$/GJ)	\$22.0735	\$24.2809
Charge for additional gas delivered (\$/G3)	\$8.6088	\$9.4725

Notes

- The total daily Charge will comprise the Fixed Charge plus a Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Domestic Delivery Point to or for the account of the Network User.
- The Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Domestic Delivery Point to or for the account of the Network User will be calculated at the rates shown in the table.
- A reference in the table to the Gas delivered through the Domestic Delivery Point is a reference to Gas delivered through the Domestic Delivery Point whether for the account of the Network User or for the account of any other person or persons.
- 4. Charges will be calculated to the nearest cent, with one-half of a cent rounded upwards.

Tariff C (Commercial Haulage Service - Charges per Network Day excl GST)

Tariff Zone	Brisbane and Riverview	Northern
Fixed Charge (\$/day)	\$0.3746	\$0.3746
Charge for the first 0.2 GJ of gas delivered (\$/GJ)	\$21.7280	\$23.8969
Charge for the next 0.3 GJ of gas delivered (\$/GJ)	\$19.8664	\$21.8532
Charge for the next 0.5 GJ of gas delivered (\$/GJ)	\$19.2140	\$21.1326
Charge for the next 1.0 GJ of gas delivered (\$/GJ)	\$18.0232	\$19.8267
Charge for the next 5.0 GJ of gas delivered (\$/GJ)	\$15.6344	\$17.2008
Charge for additional gas delivered (\$/GJ)	\$11.5938	\$12.7530

Notes

- The total daily Charge will comprise the Fixed Charge plus a Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Commercial Delivery Point to or for the account of the Network User.
- The Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Commercial Delivery Point to or for the account of the Network User will be calculated at the rates shown in the table.
- A reference in the table to the Gas delivered through the Commercial Delivery Point is a reference to Gas delivered through the Commercial Delivery Point whether for the account of the Network User or for the account of any other person or persons.
- 4. Charges will be calculated to the nearest cent, with one-half of a cent rounded upwards

Tariff D (Demand Haulage Service – Monthly Charges GJ MDQ excl GST)

Tariff Zone	Brisbane	Riverview	Northern
50 GJ or less	\$11,131.8348	\$10,490.1459	\$11,985.5739
Next 75GJ (\$/GJ MDQ)	\$104.9071	\$11.1327	\$115.2241
Next 150GJ (\$/GJ MDQ)	\$57.7656	\$10.5762	\$63.0537
Next 250GJ (\$/GJ MDQ)	\$22,9566	\$9.6740	\$24.8759
Next 500GJ (\$/GJ MDQ)	\$10.4802	\$9.6452	\$11.1807
Next 10,000GJ (\$/GJ MDQ)	\$5.3072	\$9.5780	\$5.8159
Additional G3 (\$/G3 MDO)	\$5,3072	\$9,5780	\$5.8159

Notes

- 1. The Demand Haulage Charges shown above are charges for a complete calendar month.
- 2. The Charge for a calendar month will accrue from day to day in equal portions.
- Charges will be calculated to the nearest cent, with one-half of a cent being rounded upwards.
- For the purpose of calculating daily overrun charges pursuant to clause 5 of the General Terms and Conditions, the overrun rate is \$15 per GJ (exd GST).

Ancillary Reference Service Charges (excl GST)

Description	All Zones
Disconnection Service	\$73.00
Reconnection Service	\$73.00
Special Meter Read	\$11.00

Queensland Network Tariffs - from 1 July 2020

Fariff R (Domestic Haulage Service – Charges per Network Day excl GS)

Tariff Zone	Brisbane and Riverview	Northern
Fixed Charge (\$/day)	\$0.3809	\$0.3809
Charge for the first 0.0082 GJ of gas delivered (\$/GJ)	\$41.2504	\$45.3726
Charge for the next 0.0192 GJ of gas delivered (\$/GJ)	\$22.4664	\$24.7131
Charge for additional gas delivered (\$/GJ)	\$8.7620	\$9.6411

Notes

- The total daily Charge will comprise the Fixed Charge plus a Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Domestic Delivery Point to or for the account of the Network User.
- The Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Domestic Delivery Point to or for the account of the Network User will be calculated at the rates shown in the table.
- A reference in the table to the Gas delivered through the Domestic Delivery Point is a reference to Gas delivered through the Domestic Delivery Point whether for the account of the Network User or for the account of any other person or persons.
- 4. Charges will be calculated to the nearest cent, with one-half of a cent rounded upwards.

Tariff C (Commercial Haulage Service – Charges per Network Day excl GST)

ariff Zone	Brisbane and Riverview	Northern
Fixed Charge (\$/day)	\$0.3813	\$0.3813
Charge for the first 0.2 GJ of gas delivered (\$/GJ)	\$22.1148	\$24.3223
Charge for the next 0.3 GJ of gas delivered (\$/GJ)	\$20.2200	\$22,2422
Charge for the next 0.5 GJ of gas delivered (\$/GJ)	\$19.5560	\$21.5088
Charge for the next 1.0 GJ of gas delivered (\$/GJ)	\$18.3440	\$20.1796
Charge for the next 5.0 GJ of gas delivered (\$/GJ)	\$15.9127	\$17.5070
Charge for additional gas delivered (\$/GJ)	\$11.8002	\$12.9800

Notes

- The total daily Charge will comprise the Fixed Charge plus a Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Commercial Delivery Point to or for the account of the Network User.
- The Charge for the Quantity of Gas delivered (or estimated to have been delivered) through the Commercial Delivery Point to or for the account of the Network User will be calculated at the rates shown in the table.
- A reference in the table to the Gas delivered through the Commercial Delivery Point is a reference to Gas delivered through the Commercial Delivery Point whether for the account of the Network User or for the account of any other person or persons.
- 4. Charges will be calculated to the nearest cent, with one-half of a cent rounded upwards

Tariff D (Demand Haulage Service – Monthly Charges GJ MDQ excl GST)

Tariff Zone	Brisbane	Riverview	Northern
50 GJ or less	\$11,329.9815	\$10,676.8705	\$12,198.9171
Next 75GJ (\$/GJ MDQ)	\$106.7744	\$11.3309	\$117.2751
Next 150GJ (\$/GJ MDQ)	\$58.7938	\$10.7645	\$64.1761
Next 250GJ (\$/GJ MDQ)	\$23.3652	\$9.8462	\$25.3187

Queensland Networks Light Regulation Basis of Preparation

36
36
36
37
38
40
41

Overview

Under rule 36B (1)(c) and (d) of the National Gas Rules (NGR), service providers for light regulation services are required to publish specific information, including financial information and weighted average price information. Financial and weighted average price information is intended to assist prospective users in assessing whether prices being offered by the service provider are reasonable.

In conjunction with this requirement a Financial Reporting Guideline for light regulation services (Guideline) has been published by the Australian Energy Regulator (AER) in accordance with rule 36F of the NGR. The Guideline requires the light regulation pipeline service provider to publish information on its website, in accordance with rule 36B of the NGR. In accordance with rule 36D of the NGR, the financial information must be published each financial year according to the requirements of rule 36F. Australian Gas Networks Gas Distribution Network (Queensland) (AGN Queensland) was initially subject to full regulation by the Queensland Competition Authority and AER.

In November 2014, the National Competition Council (NCC) made a decision on the form of regulation for AGN Queensland. The network is now subject to light regulation by the AER under the National Gas Law (NGL).

The table below sets out the reporting dates for pipelines that were light regulation pipelines on the commencement date of 31 October 2019:

Reporting year end	Reporting dates
30 June 2020	By 31 October 2021
31 December 2020	By 30 April 2021

As AGN Limited had a reporting year end date of 31 December 2020 it is required to publish its light regulation pipeline information by 30 April 2021.

Basis of Preparation

This Basis of Preparation (BOP) is prepared in accordance with section 9 of the Guideline which states:

Service providers are required to provide a basis of preparation separate to the financial reporting template. This is required to be published on the service provider's website with the financial reporting template.¹

The BOP must be a separate document providing information in relation to the:

- pipeline financial statements;
- pipeline information;
- regulated asset base (RAB) values;
- recovered capital method (RCM) values; and
- the weighted average prices calculated;

that the service provider publishes with its completed financial reporting template.

The BOP must:

• enable an understanding of how the amounts reported in the pipeline financial statements are determined or calculated;

¹ AER 2019, Final – Light regulation – Financial reporting guideline – 31 October 20219, page 33.

Queensland Networks Light Regulation Basis of Preparation

- assist with interpretation of information reported in the pipeline financial statements;
- assist with comparison of information provided in the pipeline financial statements to the service provider as a whole;
- provide an understanding of how shared amounts are allocated;
- explain the source/s from which the service provider obtained the information provided, including where information is obtained from external sources;
- explain the methodology the service provider applied to provide the required information, including any assumptions the service provider made and inputs used; and
- explain, in circumstances where the service provider cannot provide actual information and only estimates are available:
 - why it was not possible for the service provider to provide actual information;
 - what steps the service provider took to locate actual information;
 - if an estimate has been provided, the basis for the estimate, including the methods, assumptions and inputs used; and
 - why the estimate represents the best estimate possible in the circumstances and has been arrived at on a reasonable basis.

The statement of pipeline revenues and expenses section of the BOP must:

- include details of the sources of information used in the preparation of the financial reporting template;
- provide details of any amendments that have been made to data that was used in preparing the statement of pipeline revenue and expenses for any previous year;
- identify shared revenue and expenses, and the method that has been used to allocate these to the pipeline.

Network Specific Information

The AGN Queensland gas distribution network is owned by Australian Gas Networks (AGN – formerly known as Envestra Limited) who outsources the operation of the network to the APA Group (APA). The AGN Queensland gas distribution network covers separate areas in the Brisbane region (Brisbane CBD, north of the Brisbane River and Ipswich) and Northern Region (Rockhampton and Gladstone). In total, it consists of approximately 3,400 km of pipeline delivering gas to around 106,000 customers.

The network was initially subject to regulation as a covered pipeline under the Gas Code by the Queensland Competition Authority. It was then subject to full regulation by the AER under the NGR. In November 2014, the NCC made a decision on the form of regulation for the Queensland gas distribution network. The AGN Queensland gas distribution network is now subject to light regulation by the AER under the NGL.

No requirement to report an RCM value for AGN Queensland

Section 5 of the Guideline states:

"Where a RAB value has not been established through an access arrangement, service providers are required to determine a pipeline asset value based on a recovered capital methodology (RCM value) and disclose their calculation of this value in worksheet 4 of the financial reporting template."

For the purposes of this section, a RAB established though an access arrangement includes a RAB established through a determination made by the AER, by a determination under the Gas Code, or otherwise in accordance with any Commonwealth, State or Territory legislation. The following pipelines that were light regulation pipelines at July 2019 are considered to have a

Queensland Networks Light Regulation Basis of Preparation

RAB established under an access arrangement: Moomba to Sydney, Central West Pipeline, Allgas Gas Distribution Network and Envestra Gas Distribution Network (Queensland). For these pipelines, service providers are not required to provide the RCM value. ²

An opening RAB value for AGN Queensland has been established from the previous access arrangement when the network was subject to full regulation consequently there is no requirement to report a recovered capital method value for its assets. Thus, in accordance with section 5 of the Guideline, Worksheet 4 is therefore not applicable for AGN Queensland.

Assurance Requirement

In accordance with section 10.4.1 of the Guideline an audit is required for the information contained the **Statement of Pipeline Revenues and Expenses (Table 2.1) and Statement of Pipeline Assets (Table 3.1)** and the accompanying BOP in accordance with ASA 805 Special Considerations—Audits of Single Financial Statements and Specific Elements and ASA 800 Special Considerations—Audits of Financial Reports Prepared in Accordance with Special Purpose Frameworks, Accounts or Items of a Financial Statement.

As AGN Queensland is required to report a RAB value in accordance with Section 5 of the Guideline, there is no requirement to conduct the limited assurance review for Worksheet 4.

A limited assurance review is required of the weighted average price information in the financial reporting template and the accompanying BOP. This review is to be provided in accordance with ASRE 2405 Review of Historical Financial Information Other than a Financial Report. Worksheet 5. Weighted average price reported in the financial reporting template is blank in accordance with Section 7.3 of the Guideline as the actual pricing is already presented on the AGN website, thus the actual prices are presented in Worksheet 5.2 of the financial reporting template. There is no audit or review requirement on Worksheet 5.2.

No assurance is required for the remaining worksheets in the template.

² AER 2019, Final – Light regulation – Financial reporting guideline – 31 October 20219, page 21.

1. Pipeline Information

1.1. Pipeline details

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference

Opening Asset Base (\$m, Nominal) - RAB value	The amounts shown in this table for Opening Asset Base – RAB value are linked to the Nominal Opening Regulatory Asset Base amounts for each category of assets listed in Table 3 – Pipeline assets (i.e. the sum of opening RAB values for all asset categories).			Actual	l			Secti	on 4.1	

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Capex (\$m, Nominal)	The amounts of Capex shown in this table are linked to the Nominal Capex, Additions and Improvements Capitalised amounts for each category of assets listed in Table 3 – Pipeline assets (i.e. the sum of Capex and additions for all asset categories). Due to the transition from financial (Jul-Jun) year to calendar (Jan-Dec) year, the 2015-2019 are based on the average of the corresponding financial years. Formulae adjustments are also made to account for part years.	Actual		Section 3.2.2
Total Contribution	This category is not applicable to AGN Queensland and has therefore been left blank in the financial reporting template.			
Disposal (at cost)	The amounts of Disposals shown in this table are linked to the Disposals for each category of assets listed in Table 3 – Pipeline assets (i.e. the sum of disposals for all asset categories).	Actual		Section 3.2.2
Opex (\$m, Nominal)	Amounts reported for Opex in this table have been derived with reference to AGN Limited's SAP General Ledger (GL), amounts recorded in APA's Oracle finance system along with the ring fenced accounts (RFA's) which are provided to AGN by APA. Through the RFAs (which are explained in further detail in Appendix D) and working papers prepared by AGN Limited, these amounts are allocated to the various regulated, light regulated and unregulated assets owned by AGN Limited. Expenditure recorded against relevant account codes in the GL has been mapped to total Opex in this table and the other expenditure categories shown in the Light Regulation template (e.g.	Actual		Section 3.1.1.2

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	Table 2.1 – Statement of Pipeline Revenues and Expenses).			
Net Tax Liabilities (\$m, Nominal)	The calculations and assumptions that support the amounts reported for Net Tax Liabilities are set out in Appendix C.	Estimate	The amounts of Net Tax Liabilities reported in this table are derived by the calculations set out in Appendix C, consistent with the methodology applied under the regulatory building blocks approach. Given these calculations are for the purpose of determining the regulatory allowances for Income Tax, rather than representing the actual tax expenses for AGN Limited, the amounts reported are classified as estimated information by AGN Limited.	Section 3.2.6

1.1.1.b Building Block Revenue (\$m, Nominal) - RAB value

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Return on Capital	The amounts of Return on Capital shown in this table are calculated by the formula as provided by the AER in the financial information template. Return on Capital amounts are based on the Nominal WACC figures reported separately in this table.			Section 6.0
Return of Capital	The amounts shown for Return of Capital are linked to the amounts of Depreciation for each	Estimate (Calculated by AER RFM)	The regulatory depreciation amounts reported in this table	Section 3.2.5

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	asset class, as reported in Table 3.1 – Pipeline assets (e.g. the sum of depreciation for all asset classes each year). Due to the transition from financial (Jul-Jun) year to calendar (Jan-Dec) year the 2015-2019 are based on the average of the corresponding financial years. Formulae adjustments are also made to account for part years		are sourced from the Roll Forward Model (RFM) for AGN Queensland as published on the AGN Limited website. Given the regulatory depreciation information is not statutory accounting information, it has been classified as an estimate for the purposes of this financial reporting template.	
Operating Expenditure	Amounts reported for Operating Expenditure in this table have been derived with reference to AGN Limited's SAP General Ledger (GL) and amounts recorded in APA's Oracle finance system, which are recorded in summary form in AGN Limited's GL. The ring-fenced accounts provided by APA (as explained in Appendix D) present a regulatory view of the information recorded in its Oracle finance system. Expenditure recorded against relevant account codes in the GL has been mapped to the total Operating Expenditure in this table and the other expenditure categories shown in the Light Regulation template (e.g. Table 2.1 – Statement of Pipeline Revenues and Expenses). In addition to the direct Opex reported by APA, an allocation of AGN Limited's operating costs has been made based on various allocation factors depending on the cost category (e.g. based on customer numbers, customer growth or RAB). Further details are provided in Appendix B.	Actual		Section 3.1

Queensland Networks Light Regulation Basis of Preparation

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Net Tax Liabilities	The calculations and assumptions that support Net Tax Liabilities are set out in Appendix C.	Estimate	The amounts of Net Tax Liabilities reported in this table are derived by the calculations set out in Appendix C, consistent with the methodology applied under the regulatory building blocks approach. Given these calculations are for the purpose of determining the regulatory allowances for Income Tax, rather than representing the actual tax expenses for AGN Limited, the amounts reported are classified as estimated information by AGN Limited.	Section 3.2.6
Actual Revenue	Actual Revenue includes haulage and ancillary reference services revenue sourced from AGN Limited's SAP General Ledger and associated working papers prepared for the purpose of categorising revenue for regulatory and other management reporting purposes. Ancillary non-reference services and other unregulated-type services revenue has been deducted to reflect the equivalent of revenue formerly classified as regulated under full regulation as per the Nation Gas Rules.	Actual		Section 3.1

	Expenditure reported in this category is the expenditure incurred by AGN Limited in relation to the repair and maintenance activities for the AGN Queensland light regulation pipeline.			
Repairs and maintenance	The repair and maintenance of AGN Queensland's light regulation pipeline has been contracted to APA under the Operating and Management Agreement (OMA). It is noted that APA incurs other Opex costs in providing these services to AGN Limited (e.g. general and administrative costs), however all such costs are effectively bundled into the monthly charges from APA. For this reason, all expenditure incurred under the	Actual		Section 3.1.1.2

Variable	Data Source, Methodology and Assumptions Actual / Estima	te Justification (if estimated)	Guideline Reference
	OMA with APA that is not Capex, is classified as Repairs and Maintenance expenditure.		
	APA's network overheads include an allocation of the Network Management Fee (NMF) paid by AGN Limited, including for AGN Queensland, which for statutory accounting purposes remains in capitalised network overheads (i.e. 65% of the NMF is capitalised for statutory accounting purposes). During the July 2011 to June 2016 period AGN changed its classification of NMF from Capex to Opex to reflect the AER's decision to include the expenditures associated with the proposed NMF in AGN's forecast Opex for the 2011/12 to 2015/16 period ³ . This change was implemented by AGN from July 2012 onwards.		
	Piecemeal mains replacement costs are also transferred from Capex to Opex.		
	In addition, an adjustment has been made to remove Repairs and Maintenance expenditure associated with unregulated revenues of AGN Queensland, which have also been removed from the revenue amounts reported for AGN Queensland.		
	Amounts reported for Repairs and Maintenance and each other category of expenditure in this table have been derived with reference to AGN		

³ AER Draft Decision, Envestra Ltd Access arrangement proposal for the Qld gas network, p 136

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	Limited's SAP General Ledger (GL) and the APA ring-fenced accounts (RFA's).			
Wages	AGN Queensland does not incur direct wage costs, as these activities are outsourced to APA under the OMA. Wages are therefore included in the total repairs and maintenance cost shown above which are charged to AGN Limited by APA.	Actual		Section 3.1.1.2
Depreciation	Depreciation has been calculated using the Roll Forward Model included with this information pack and published on the AGN Limited website.	Estimate (Calculated by AER RFM)	The regulatory depreciation amounts reported in this table has been sourced from the Roll Forward Model (RFM) for AGN Queensland as published on the AGN Limited website. Given the regulatory depreciation information is not statutory accounting information it has been classified as an estimate for the purposes of this financial reporting template.	Section 3.1.1.2
Insurance	Insurance costs are disclosed separately as part of shared costs in Table 2.4.1 against the category "Other shared costs"	Actual		Section 3.1.1.2
Licence and regulatory costs	Licence and regulatory costs include licence fees paid to Resources Safety & Health Queensland.	Actual		Section 3.1.1.2
Directly attributable finance charges	AGN Queensland has no directly attributable finance charges to report. Borrowing costs are disclosed as a category of shared costs in Table 2.4.1.	Actual		Section 3.1.1.2

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Leasing and rental costs	AGN Queensland does not incur direct leasing and rental costs, as these activities are outsourced to APA under the OMA or are allocated by AGN Limited as a shared cost. Leasing and rental costs related to the OMA with APA are included in the total repairs and maintenance cost shown above.	Actual		Section 3.1.1.2
Other direct costs	Unaccounted for gas (UAFG) is shown in this cost category.	Estimate	Due to the 9-month revision period described in Chapter 11 of the AEMO Retail Market Procedures (Queensland), UAFG is initially estimated and subsequently trued-up once actual final volumes are published.	Section 3.1.1.2

2.1.d Shared Costs

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
2020	Refer to Appendix D for a description of the systems and processes that support AGN Limited's cost capture and reporting of operating costs, particularly in relation to shared costs allocated to AGN Queensland by AGN Limited as presented below. A full explanation of the allocators used and reasons for their use, consistent with the AGN Limited Cost Allocation Methodology, are set out in Appendix B.			
Employee costs	This cell in Table 2.1 is linked to the Employee costs input cell in Table 2.4.1 – Shared cost allocation.	Estimate	Due to the process of allocating AGN Limited's total in-house labour, which requires relevant personnel (who are employed at the group level) to estimate the	Section 3.2.7

Distribution/transmissi on revenue	The amount reported in this table has been sourced from AGN Limited's SAP General Ledger and associated working papers prepared for the purpose of categorising revenue for regulatory and other management reporting purposes. The	Actual		Section 3.2.7

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	revenue has been separated from revenue generated by other unregulated assets by reference to these associated working papers and quarterly revenue reconciliations provided by APA.			
	Ancillary non-reference services and other unregulated-type services revenue has been deducted to reflect the equivalent of revenue formerly classified as regulated under full regulation.			
Customer contribution revenue	Capital contributions received from customers are not treated as operating income but deducted from the related Capex incurred by AGN Queensland, such that the net cost is reflected in the RAB. Hence there are no capital contributions revenue to report in this table. This is linked to table 2.2.1.	Actual		Section 3.1.1
Government contribution revenue	Capital contributions received from Government bodies is not treated as operating income but rather deducted from the related Capex incurred by AGN Queensland, such that the net cost is reflected in the RAB. Hence there is no Government contributions revenue to report in this table. This is linked to table 2.2.2.	Actual		Section 3.1.1
Profit from sale of fixed assets	AGN Limited has no amount to report for Profit from sale of fixed assets in 2020. Profits from the sale of fixed assets can be sourced from AGN Queensland's SAP GL which is used to account for AGN Queensland's Property, Plant and Equipment assets and which is	Actual		Section 3.1.1

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	integrated to a Fixed Asset Register for AGN Queensland.			
Other direct revenue	This category is mainly comprised of ancillary reference services (ARS) as listed in the published tariff schedules shown in worksheet 5.2. AGN Limited utilises APA to provide the services categorised as ARS. The information to report ARS revenue against the categories shown in this table has been sourced initially from data provided by APA via its billing system Customer Care and Billing (CC&B) which also enables the recording of revenue reported in the RFAs each year. This data, provided by APA, lists revenue against service types that enables AGN Limited to identify revenue for ARS services, amongst other types of services (e.g. Non-reference services). APA reconciles the revenue figures provided to AGN Limited to its own General Ledger to ensure its accuracy.	Actual		Section 3.1.1

2.2 Revenue contributions

Employee costs	Employee costs for AGN personnel are pooled across AGN's operations and allocated on the basis of the increase in customer numbers, or directly where possible, in accordance with the processes set out in Appendix B.	Estimate	Due to the process of allocating AGN Limited's total in-house labour which requires relevant personnel who are employed at the group level, to estimate the time spent on each state and between regulated and unregulated businesses, the resulting amounts reported are considered estimated information by AGN Limited.	Section 3.2.7	
Information technology and communication costs	AGN Queensland has no costs to separately report for shared Information Technology and Communication costs, as these costs are included in the charges from APA which are reported in Repairs and Maintenance and also in Other	Actual		Section 3.2.7	

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	Shared costs. Depreciation for shared IT assets is reported in Shared Asset Depreciation below.			
Indirect operating expenses	AGN Queensland has no costs to report which are treated as Indirect Operating Expenses.	Actual		Section 3.2.7
Shared asset depreciation	Amounts reported for Shared Asset Depreciation represent depreciation on shared IT assets (as shown in the RFM) utilised by AGN Queensland. The amount reported has been adjusted to deduct a share of depreciation for AGN Queensland's unregulated activities based on the number of unregulated asset customers as a percentage of all AGN Queensland customers.	Estimate (Calculated by AER RFM)	The regulatory depreciation amounts reported in this table has been sourced from the Roll Forward Model (RFM) for AGN Queensland as published on the AGN Limited website. Given the regulatory depreciation information is not statutory accounting information, it has been classified as an estimate for the purposes of this financial reporting template.	Section 3.2.7
Rental and leasing costs	AGN Queensland has no shared Rental and Leasing costs to separately report in this financial reporting template. Other Shared costs includes an allocation of office rental costs to AGN Queensland from AGN Limited, which has been done in accordance with the processes set out in Appendix B.	Actual		Section 3.2.7
Borrowing costs	AGN Limited manages its debt facilities for the group as a whole, therefore expenditure reported in this category represents an allocation of the total borrowing costs associated with debt raising by AGN Limited. Costs have been allocated to AGN Queensland in accordance with the processes set out in Appendix B.	Actual		Section 3.2.7

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
	Expenditure reported for borrowing/debt raising costs comprise the following fees and charges paid in relation to raising debt financing for AGN Limited:

Nominal Opening Regulatory Asset Base	Prior to light regulation in November 2014 AGN Queensland was subject to full regulation. In accordance with the Financial Reporting Guideline for Light Regulation (the "Guideline"), the previously determined asset value under full regulation has been used as the opening RAB. The last approved access arrangement for AGN Queensland was for the period 2011-2016,	Actual		Section 1.1.1 of the Guideline states: Where one exists, the last previously determined asset value from an access arrangement under the NGR, Gas Code

Queensland Networks Light Regulation Basis of Preparation

Variable	Data Source, Methodology and Assumptions Ac	ctual / Estimate	Justification (if estimated)	Guideline Reference
	consequently the last determined RAB was June 2011.			or other Commonwealth, State or Territory legislation is to be used to determine the opening asset value, which is then to be rolled forward in accordance with the RFM Material
Nominal Capex and Additions and Improvements capitalised	Capex reported for all years has been identified with reference to the expenditure captured in APA's Oracle finance system against relevant Capex categories. For 2019 and 2020, a small share of AGN IT project capex has been allocated to Queensland. During the July 2011 to June 2016 period AGN changed its classification of NMF from Capex to Opex to reflect the AER's decision to include the expenditures associated with the proposed NMF ⁴ . Piecemeal mains replacement costs are also transferred from Capex to Opex.	Actual		Section 3.2.2

⁴ AER Draft Decision, Envestra Ltd Access arrangement proposal for the Qld gas network, p 136 https://www.aer.gov.au/system/files/Envestra%20draft%20decision%20-%20Qld.pdf

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference	
	In accordance with the calculations incorporated in the Roll Forward Model (RFM) capex is adjusted by a 6 month period of WACC.				
Depreciation	Depreciation has been calculated using the regulatory asset lives for each asset class which are consistent with the asset lives disclosed in the respective Roll Forward Models and as described in section 3.1.1.a of this Basis of Preparation. In accordance with the calculations incorporated in the Roll Forward Model (RFM) regulatory nominal depreciation includes an adjustment for inflation.	Estimate (Calculated by AER RFM)	The regulatory depreciation amounts reported in this table has been sourced from the Roll Forward Model (RFM) for AGN Queensland as published on the AGN Limited website. Given the regulatory depreciation information is not statutory accounting information it has been classified as an estimate for the purposes of this financial reporting template.	Section 3.2.5	
Disposals	Disposals are recorded as proceeds received when an asset is disposed of, as they are considered to be a return of capital. Asset disposals are relatively infrequent due to the nature of the assets employed to operate the network. The amounts of disposals reported in this table have been sourced from the SAP General Ledger for AGN Queensland and which are also recorded in the Roll Forward Model for AGN Queensland.	Actual		Section 3.2.2	
Asset Categories	As required by the Guideline, Pipeline assets have been reported in the following classes of assets.				
Pipelines	Includes the RFM asset categories of "Mains" and "Inlets"			Section 3.2.1	

Variable	Data Source, Methodology and Assumptions Actual / Estimate Justification (if estimated)	Guideline Reference
Compressors	Not an AGN Queensland asset category	Section 3.2.1
City Gates, supply regulators and valve stations	Includes the RFM asset categories of "Other Distribution System Equipment"	Section 3.2.1
Metering	Includes the RFM asset categories of "Meters"	Section 3.2.1
Odourant plants	Not an AGN Queensland asset category	Section 3.2.1
SCADA (Communications)	Includes the RFM asset categories of "Telemetry"	Section 3.2.1
Buildings	Not an AGN Queensland asset category	Section 3.2.1
Land and easements	Not an AGN Queensland asset category	Section 3.2.1
Other depreciable pipeline assets	Includes the RFM asset categories of "Other"	Section 3.2.1
Leased pipeline assets	Not an AGN Queensland asset category	Section 3.2.1
Shared supporting assets	Includes the RFM asset category "IT System". These shared supporting assets includes Capex for certain IT projects which are managed and delivered at the AGIG group level since 2019. The processes for allocation of AGIG group IT Capex, including allocation to AGN Limited, of which a portion is allocated to AGN Queensland, is set out in the AGN Limited Cost Allocation Methodology.	Section 3.2.1

Queensland Networks Light Regulation Basis of Preparation

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Shared leased assets	Not an AGN Queensland asset category			Section 3.2.1
CPI	Indexation each year is based on the CPI weighted average of eight capital cities as published by the Australian Bureau of Statistics. For the years 2010-11 to 2015-16, the asset base is indexed using lagged March CPI (for instance for the year 2015-16, the asset base was indexed using March 2015 divided by March 2014 CPI), which reflects the Access Arrangement in place during that period. From 2016-17, the RAB was indexed using lagged December CPI reflecting a similar change made by the AER for fully regulated networks to shift from a 3 month to 6 month lag. As an example, the fully regulated South Australian network shifted from March to December from 2016-17.			Section 3.2.1

3.1 Pipeline asset useful life

3.1.1.a Asset useful life

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Asset Life Changes from 1 July 2016	Asset lives are sourced from the Roll Forward Mode Our depreciation schedule is designed such that oue expected economic life of particular assets. With the increasing use of renewable electricity, untarget to reach zero net emissions by 2050, there is network. While detailed policies to achieve this tandecades ahead, suggesting that in the absence of not without technical challenges), an economic life. Given the long-lived nature of some of our assets, assets means that delays will make it harder to act While significant uncertainty remains, since 1 July asset life for our mains and inlet assets to 40 years life for our IT systems has been aligned with the fisince 1 July 2016. This change in depreciation will the associated distribution prices for customers in Acquisition date is detailed as "Various" in table 3. range of dates in the Fixed Asset Register. As the apprescribed in the light regulation template, the use access arrangement. This will vary year on year as	ar assets are depreciated in assets are depreciated in a certainty around future is uncertainty about the reget have not yet been established by this requires us to act not this requires us to act not in the long run interests 2016 we have taken a consistency of the lower RAB who was a cons	energy models, and the Queensland ong-term future role of Queensland tablished, we believe these policies ted in the Queensland gas network a aligned with this policy. The property is a series of consumers in the future as chast of consumers and the future as the return of capital or consumers are consumers as a series of consumers and the future as a series	of Government's stated is natural gas is will tighten in the is a prospect which is ion profile of networkinges accelerate. I ijusting the maximum additionally, the asset in our asset base and iresents the various is at categories.
Pipelines Compressors City Gates, supply regulators and valve stations Metering	The Roll Forward Model published on AGN's website includes asset useful lives for these categories.			Appendix A

Odourant plants SCADA (Communications) Buildings Other depreciable pipeline assets				

3.2 Shared supporting assets

3.2.1.a Shared supporting asset allocation

Variable	Data Source, Methodology and Assumptions	Actual / Estimate		Guideline Reference		
2020	Data has been sourced from the AER-approved opening RAB values from June 2011. The allocation to Queensland Light Regulated networks is based on the total IT asset value for AGN Queensland multiplied by the percentage of Light Regulated customers, compared to total customers (including unregulated asset customers i.e. the Wide Bay Pipeline and Distribution Network).					

4. Recovered capital

4.1 Recovered capital method - pipeline assets

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference		
2020	An opening RAB value for AGN Queensland has been established from a previous access arrangement (2006-2011) when the network was subject to full regulation. Consequently, there is no requirement to report a recovered capital method value for its assets. In accordance with section 5 of the Guideline, Worksheet 4 is therefore not applicable to AGN Queensland.					

4.1 Pipelines capex

4.1.1 Capital expenditure greater than 5% of construction cost

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	•	Guideline Reference		
2020	Capital expenditure amounts which are more than 5% of the construction cost are to be disclosed in worksheet 4.1 of the financial reporting template. This worksheet only applies to pipelines adopting asset valuation using the recovered capital method. AGN Queensland has not adopted this method, therefore this table 4.1.1 has not been completed.					

5. Weighted average price

5.1 Weighted average prices

Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Calendar year 2020 comprising of six months of 2019/20 and six months of 2020/21	Section 7.3 of the Guideline states "Where the serv website, the service provider may use the blank tel information, in lieu of the format for presenting we template." In AGN Queensland's case, actual pricin 2019/20 and 2020/21 have been copied into works	mplate (worksheet 5.2 of highted average price info ng is already presented o	f the financial reporting template) to ormation in worksheet 5.1 of the fin on its website and therefore the tari	o set out its pricing nancial reporting iff schedules for

5.1 Exempt WAP services

5.1.1 AER exemptions

	Variable	Data Source, Methodology and Assumptions	Actual / Estimate	Justification (if estimated)	Guideline Reference
Not applicable to AGN Queensland because prices are published on its website.					

5.2 Actual Pricing

Variable	Data Source, Methodology and Assumptions	Actual / Estimate		Guideline Reference	
Calendar year 2020 comprising of six months of 2019/20 and six months of 2020/21	Section 7.3 of the Guideline states "Where the service provider's actual pricing is already presented on the service provider's website, the service provider may use the blank template (worksheet 5.2 of the financial reporting template) to set out its pricing information, in lieu of the format for presenting weighted average price information in worksheet 5.1 of the financial reporting template." In AGN Queensland's case actual pricing is already presented on its website and therefore the tariff schedules for 2019/20 and 2020/21 have been copied into worksheet 5.2 in lieu of the weighted average price information required in worksheet				

Appendix A: Weighted Average Cost of Capital

This information relates to rows 280 to 290 of the tab "RFM input" covering the WACC and inflation in the Roll Forward Model workbook.

The weighted average cost of capital information is based upon the similar information provided to the AER as part of our South Australian business. That is, we use the same WACC and inflation data that are used in South Australia. This is because our South Australian and Queensland networks are owned and governed together within AGN.

Data for 2010-11 to 2015-16 (columns G through L in the spreadsheet) are drawn from the AER's final decision for AGN South Australia made in May 2016, and more specifically the Roll Forward Model approved as part of that decision⁵.

Data from 2016-17 to 2020-21 (columns M though Q in the spreadsheet) are drawn from our revised final plan provided to the AER on 13 January 2021⁶. This RFM has not yet been approved by the AER, but the WACC numbers have been approved by the AER for 2016-17 to 2020-21 in its updated PTRM for our current SA Access Arrangement period⁷. The actual inflation numbers are year to December "8 capital city average" (ABS Cat no 6401.0) as per the AER approach for AGN SA.

In respect of how the data have been prepared, in every case, we have followed the approaches mandated by the AER. Further detail on:

- WACC is available in the 2018 Rate of Return Instrument⁸; and
- The Roll Forward Model and the PTRM is available in the handbooks9.

Appendix B: Shared Cost Allocation Principles

In accordance with section 3.2.7 of the Guideline, the following information is provided to support the allocation of shared costs to the AGN Queensland network:

The internal expenses incurred by AGN Limited that are not already directly attributed to AGN Queensland, are allocated by applying an appropriate causal cost driver, as outlined below. Cost categories may be directly allocated, indirectly allocated or a combination of both.

There are three drivers primarily used as the basis of indirectly allocating AGN's internal expenses.

- Existing customer numbers
- Increase in customer numbers; and
- Regulatory asset base

When used, these cost allocators have been selected as being an appropriate driver due to being the most significant trigger of consumption or utilisation of resources for given expenditure categories.

AGN Limited allocates its internal expenses to each of the regulated and unregulated pipelines it owns in South Australia, Victoria, Queensland, New South Wales, the Northern Territory and to any other unregulated business activities.

Table B1 below lists the categories within AGN's expenses and the method or driver with which they are typically allocated. For completeness, the table also lists items of expenditure that are directly allocated.

Expenditure allocated in accordance with this methodology is accounted for as operating expenditure in AGN Limited's regulatory reporting to the AER and encompasses all AGN Limited's internal functions.

Table B1: Shared Cost Allocation

Expenditure categories	Directly Allocated	Indirectly Allocated	Basis of allocation to Regulated and Unregulated pipelines/activities	Reasons for selecting the allocator and is it the most appropriate
Corporate Costs (e.g. ASIC costs, insurance etc.)		X	Existing customer numbers	 Customer numbers indicate the size of the network and which drives associated risks from an insurance perspective
Debt Raising Costs (costs incurred in relation to raising debt instruments for investment in AGN's networks)		Х	Regulatory Asset Base	 RAB is an indicator of borrowings, refinancing costs and debt commitments
Marketing (costs relating to marketing the use of natural gas and rebates to customers)	Х	X	DirectExisting customer numbers	 AGN owns several gas networks across Australia. There are marketing efforts that are network based and others that are national. Customer numbers are the best indicator of where marketing attention is focused.
Other (e.g. office expenses, travel, entertainment, conferences etc.)	Х	Х	Existing customer numbersRegulatory Asset Base; andDirect	 A mix of drivers is used for other expenses depending on the nature of the cost.
Payroll Costs (salaries and related labour costs)	Х	Х	Increase in customer numbers; andDirect	 Increase in customer numbers is the most significant trigger of consumption or utilisation of AGN payroll resources.
Professional Costs (General legal, consulting and audit costs)	Х	Х	Increase in customer numbers; andDirect	 Increase in customer numbers is the most significant trigger of consumption or utilisation of AGN professional resources.

Appendix C: Net Tax Liabilities Table 1.1.1

Rules 76 of the NGR states that total revenue is to be determined for each regulatory year of the access arrangement period using the building block approach in which the building blocks are:

- (a) a return on the projected capital base for the year; and
- (b) depreciation on the projected capital base for the year; and
- (c) the estimated cost of corporate income tax for the year; and
- (d) increments or decrements for the year resulting from the operation of an incentive mechanism to encourage gains in efficiency (See Division 9); and
- (e) a forecast of operating expenditure for the year.

Generally, tax costs are the same costs included in the building blocks, with the exception of depreciation. Tax depreciation is based on a much shorter tax life (accelerated depreciation) or calculated in a different way which creates a timing difference.

Coupled with this, equity earnings are taxable but the return on debt (i.e. interest expense) is deductible for tax purposes. As the allowed return on equity is an after-tax return, the regulatory building blocks must include a tax allowance. The revenue allowance must therefore allow for the appropriate payment of tax applicable to the annual taxable income of equity holders adjusted for tax imputation credits. The tax allowance is therefore given by the formula $t/(1-(1-\gamma)t)$ where t is the applicable company tax rate of 30% and gamma (γ) is assumed to be 25%. The applicable tax multiplier to be applied to taxable income is therefore 30%/(1-(1-25%)x30%) = 38.97%.

The tax calculation which supports the net tax liabilities in Table 1.1.1. is shown below (\$m):

	2011-12	2012-13	2013-14	2014-15	2015-16	2016-17	2017-18	2018-19	2019-20	2020-21

Appendix D: Cost Collection and Reporting Process – Capex and Opex

Source of financial data

Financial data for this Light Regulation Financial Reporting Template was sourced from AGN Limited's finance system (SAP Business One) and from other information provided by AGN Limited's principal capital delivery contractor, APA Asset Management (APA). AGN Limited utilises Excel spreadsheets to consolidate detailed financial information provided by APA with information from its own finance system and to undertake cost allocation processes, for the purpose of producing the data required to complete the AER's financial reporting templates. This information and the associated processes are explained further below.

AGN Limited's capital delivery contractor and operating and management sub-contractor (APA)

When AGN Limited was known as Envestra Limited (Envestra), the delivery of its distribution network capex program and the operation and management of its distribution network was out-sourced to APA under an operating and management agreement. This arrangement (the 'OMA') commenced on 2 July 2007 and has continued since that time, including through Envestra's change of ownership and rebranding as "Australian Gas Networks" in October 2014.

APA charges AGN Limited for these services on a 'cost pass-through' basis each month, plus the agreed Network Management Fee (NMF). The NMF represents APA's margin under the agreement.

APA's business support and overhead costs are allocated to capital expenditure in accordance with the processes outlined in the AGN Limited Cost Allocation Methodology (CAM). For regulatory accounting purposes, AGN Limited does not capitalise any of the NMF as 100% of the NMF paid to APA is treated as operating expenditure.

Source of financial data provided by APA

APA uses an enterprise resource planning system (Oracle) and an asset management system (Maximo) to capture costs which are assigned to master data identifiers including tasks, activities and expense types. In addition, with the use of additional master data identifiers (i.e. project codes and cost centres) APA records its expenditure against specific regulated and unregulated gas pipelines operated by AGN Limited in each state and to relevant regions within each state (also referred to as business zones).

Capex

APA provides detailed information about capital expenditure on AGN Limited's regulated and unregulated pipelines directly from Oracle and via its business intelligence (BI) tool 'Cognos'. The output created from this is known as the Ring Fenced Accounts (RFA). The RFA is prepared by APA each half year and reports on all expenditure (operating and capital), including the capitalisation of support and shared business costs and allocations into each of AGN Limited's regulated and unregulated business zones. The RFAs have been, and continue to be a key source of data for regulatory reporting purposes. Amongst other things, capital expenditure information from the RFAs is used to reconcile to the additions to the fixed assets register for the Queensland light regulation network.

AGN Limited fully reconciles all sources of capital expenditure reporting provided by APA with its own SAP general ledger, separate billing data received from APA and with reporting provided in the AER's financial reporting templates.

Queensland Networks Light Regulation Basis of Preparation

Opex

APA provides detailed information about operating expenditure on AGN Limited's regulated and unregulated pipelines via its business intelligence (BI) tool 'Cognos'. This information enables AGN Limited to map expenditure into the categories that are defined in the AER's financial reporting templates (e.g. Repairs and Maintenance, License and Regulatory Costs and the various Shared Costs categories).

Operating expenditure information from APA is produced using its Cognos BI tool which extracts data from Oracle. This information is provided as part of the 'Ring Fenced Accounts' prepared by APA each half year. The Ring Fenced Accounts (RFAs) report on all expenditure (operating and capital), including the allocation of support and shared business costs into each of AGN Limited's regulated and unregulated business zones. The RFAs have been, and continue to be a key source of data for regulatory reporting purposes.

AGN Limited fully reconciles the operating expenditure reporting provided by APA in the RFAs with its own SAP general ledger, separate billing data received from APA and with reporting provided in the AER regulatory templates.

AGN Limited business systems and cost capture

AGN Limited utilises SAP Business One (SAP) to capture costs at the general ledger account code, department and state level where applicable. Given the arrangements with APA, AGN Limited does not operate a full enterprise resource planning (ERP) system. Within SAP, AGN Limited utilises the general ledger, accounts payable and fixed asset register modules.

Monthly charges invoiced from APA are recorded in AGN Limited's general ledger via journal entries which assign costs to general ledger account codes, departments and state codes. These entries provide control totals against which separate reporting provided by APA, including Monthly Management and Operating Reports, is able to be reconciled.

Capex

The detailed view of network capital expenditure delivered by APA is provided via separate reporting outside of AGN Limited's core finance systems, as described above (e.g. the Ring Fenced Accounts, via Cognos BI reporting tools and the Capex Data Model in Microsoft Excel format). This information is used to complete the AER's financial reporting templates.

Adjustments are made by AGN Limited to the network capital expenditure reported by APA which are recorded in the Excel spreadsheets that form the working papers which support the data reported in the regulatory templates. These adjustments are in accordance with AGN Queensland's Regulatory Accounting Principles and Policies document.

AGN Limited's internal non-network capital expenditure, primarily relating to corporate ICT systems and office furniture and fittings, is captured in the SAP general ledger by account code, which enables reporting against categories defined in the AER's financial reporting templates.

AGN Limited does not capitalise any of its general corporate management and administration costs for regulatory accounting purposes, unless it can be specifically linked to a capital activity (e.g. a corporate IT project). This is in accordance with the AGN Queensland Regulatory Accounting Principles and Policies document.

Opex

Monthly charges invoiced from APA are recorded in AGN Limited's general ledger via journal entries which assign costs to general ledger account codes, departments and states. These entries provide control totals against which separate reporting provided by APA is able to be reconciled.

Queensland Networks Light Regulation Basis of Preparation

The detailed view of network operation and management expenditure undertaken by APA is provided via separate reporting outside of AGN Limited's core finance systems, as described above (e.g. the Ring Fenced Accounts). This information is used to complete the AER regulatory templates.

AGN Limited's internal operating expenditure for its corporate management and administration costs, is captured in the SAP general ledger by account code, department and state where applicable, which enables reporting against categories defined by the AER regulatory templates.

A reporting tool outside of SAP (Qlikview) is used by AGN Limited to extract operating expenditure data from SAP and to produce reports for regulatory and other financial management purposes.

These reports are exported into Excel spreadsheets which are used for the purpose of consolidating financial data (APA sourced and AGN Limited data) and to undertake cost allocation processes across AGN Limited's regulated and unregulated business zones in accordance with the AGN Limited CAM. Consolidation processes include combining detailed operating expenditure information provided by APA with AGN Limited's own internal operating expenditure information.

Reconciliation of data and information reported to the AER

As already mentioned above, AGN Limited fully reconciles all sources of capital expenditure reporting provided by APA, back to control totals in its own SAP general ledger, additions to the fixed assets register for AGN Queensland and separate invoices received from APA which are entered into the general ledger.

AGN Limited also fully reconciles operating expenditure reporting provided by APA, back to control totals in its own SAP general ledger and separate invoices received from APA which are entered into the general ledger.

All financial information provided to the AER in the financial reporting templates is also reconciled back to AGN Limited's SAP general ledger.

Independent auditor's report

To the Directors of Australian Gas Networks Limited

Our opinion

We have audited the historical financial information within the accompanying Financial reporting template of Australian Gas Networks Limited (the Company) from 1 January 2020 to 31 December 2020 as required by the Financial Reporting Guideline for Light Regulation Pipeline Services issued by the Australian Energy Regulator published in October 2019 (the "Guideline").

The Schedules comprise:

- Table 2.1 Statement of pipeline revenues and expenses for the year ended 31 December 2020; and
- Table 3.1 Statement of pipeline assets as at 31 December 2020.

In our opinion the Schedules are prepared, in all material respects, in accordance with the Guideline and the Company's Basis of Preparation.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Schedules* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We are independent of the Company in accordance with the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to our audit of the Schedules in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Emphasis of matter - basis of accounting and restriction on distribution and use

We draw attention to the Basis of Preparation accompanying the Schedules which describes the basis of accounting. The Schedules have been prepared to assist the Directors to meet the requirements of the Guideline. As a result, the Schedules may not be suitable for another purpose.

Our report has been prepared for the Directors for the purpose agreed in our engagement letter dated 30 April 2021. We disclaim any assumption of responsibility for any reliance on this report to any persons or users other than the Directors of Australian Gas Networks Limited, or for any other purpose other than that for which it was prepared. Our opinion is not modified in respect of this matter.

Other information

The management and the Directors are responsible for the other information. The other information comprises the information included in the Financial reporting template but does not include Table 2.1 and Table 3.1 and our auditor's report thereon.

Our opinion on the Schedules does not cover the other information and accordingly we do not express any form of assurance conclusion thereon.

In connection with our audit of the Schedules, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the Schedule or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed on the other information that we obtained prior to the date of this auditor's report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and the Directors for the Schedules

Management of the Company is responsible for the preparation and fair presentation of the Schedules in accordance with the Guideline and the Company's Basis of Preparation and for such internal control as management determines is necessary to enable the preparation of Schedules that are free from material misstatement, whether due to fraud or error.

The Directors are responsible for overseeing the Company's financial reporting process related to the Schedules.

Auditor's responsibilities for the audit of the Schedules

Our objectives are to obtain reasonable assurance about whether the Schedules are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the Schedules.

As part of an audit in accordance with the Australian Auditing Standards, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Schedules, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Evaluate the overall presentation, structure and content of the Schedules, including the disclosures, and whether the Schedules represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
